What was recovered

OTE DESIGNCRAFT REVIEW · RECOVERED SOURCES + RECONSTRUCTED TOOLS

12 distinct source PDFs, with 156 pages, and 12 IDML files were recovered from the supplied Drive archive.

The earlier custom prototype and its generated ZIP files were not recovered. Recipes and tools here are newly recreated.

Byte-identical PDFs are in originals/. Reading copies larger than 24 MiB were optimized for static hosting.

Actual horizontal logo artwork and the stacked masthead from the September cover are included.

104 recipes: 76 story layouts, 14 ads, six custom pieces, eight covers. Catalogue pages are schematic geometry.

Native examples are generated through stock DesignCraft v0.4.0; their own preflight reports describe actual results.

Source: user-supplied archive and stock DesignCraft v0.4.0. No recovered prototype claim.

Using OTEManager and DesignCraft

OTE DESIGNCRAFT REVIEW · RECOVERED SOURCES + RECONSTRUCTED TOOLS

1. In OTEManager Publications, choose DesignCraft ZIP for an issue.

2. Open Utilities > DesignCraft layouts, or the separate review Site. Import the issue ZIP.

3. Choose one, two or three stories and their photo arrangement. Reserve custom pieces if required.

4. Adjust shared questions/answers and boundaries. Download the page recipe ZIP and extract it.

5. Run compile-template.py against templates.json and issue.json, with the stock CLI path.

6. Inspect preflight.json. Overset blocks final export; the native draft retains the complete article text.

The browser preview shows composition; it does not perform native font shaping or prove text fit.

Issue JSON includes exact stored Markdown, original media bytes, captions and stable IDs. Missing media rejects export.

Source: user-supplied archive and stock DesignCraft v0.4.0. No recovered prototype claim.

Fonts, covers and the double truck

OTE DESIGNCRAFT REVIEW · RECOVERED SOURCES + RECONSTRUCTED TOOLS

The original PDFs preserve their rendered branding. New editable samples use licensed Source Sans 3 and Source Serif 4.

Source 2025 covers reference Decalotype Black, Helvetica Neue Bold/Condensed Bold, and Salted. Salted file was not found.

Original font references are documented. Proprietary font files are not redistributed in this package.

The double truck is the continuous centre spread: 16 pages means 8/9; 20 pages means 10/11.

A print-ready booklet requires a multiple-of-four page count. Several supplied 17-page issues are unfinished layouts.

Recipes record cover/truck preservation requests. Native whole-issue preservation has not yet been rebuilt.

The seven native examples passed DesignCraft preflight. Actual Adobe InDesign import has not been tested.

Remaining integration: native export backend in OTEManager, exact original font profiles, whole-issue protection, and browser/WASM command bridge.
